

I would like to welcome you all to session 212. Equine Foot Research with Dr. Brian Beasley. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

After receiving his DVM from the University of Illinois, Dr. Brian Beasley spent several years at Rood and Riddle Equine Hospital in Lexington, where he first completed a hospital internship prior to joining their equine podiatry service. Dr. Beasley achieved diplomate status with the American College of Veterinary Sports

Medicine and Rehabilitation in 2021 and is currently a clinical assistant professor in equine sports medicine and podiatry at the University of Georgia.

Please Welcome Dr. Brian Beasley

I would like to welcome you all to session 213. Advanced Imaging and Equine Podiatry with Dr. Brian Beasley. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

I would like to welcome you all to session 215. Clinical Approach to Equine Muscle Disease with Dr. Stephanie Valberg. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Stephanie Valberg is an internationally known expert on neuromuscular disease in horses. Her research has focused on the genetic and environmental basis for muscle disease in horses, optimal methods for their diagnosis, and development of targeted

treatment. She has received numerous awards for her work, including induction into the Equine Research Hall of Fame and giving the Milne Lecture at the American Association of Equine Practitioners Convention.

Please Welcome Dr. Stephanie Valberg

I would like to welcome you all to session 216. Why Are Horses So Susceptible to Rhabdomyolysis? with Dr. Stephanie Valberg. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

I would like to welcome you all to session 218. Ruminant Fractures: Management Strategies for the Farm and Clinic with Dr. Joseph Lozier. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Joe Lozier received his DVM from The Ohio State University in 2014. He went on to complete an internship and residency in farm animal medicine and surgery at OSU. He received a master's degree and completed a residency in 2018. Dr. Lozier is a

diplomate of the American College of Veterinary Surgeons, specializing in large animal, and is an assistant professor of farm animal medicine and surgery at The Ohio State College of Veterinary Medicine.

Please Welcome Dr. Joseph Lozier

I would like to welcome you all to session 219. Septic Arthritis in Calves: Diagnosis, Treatment, and Outcomes with Dr. Joseph Lozier. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. I would like to welcome you all to session 220. Recognizing and Responding to Suspected Cases of Farm Animal Cruelty: The Role of the Vet. with Dr. Jess Pempek. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Jess Pempek is an assistant professor at The Ohio State University in the Department of Animal Sciences, where her research centers around animal welfare. She holds a Ph.D. and

master's in animal welfare and behavior, as well as a bachelor's in animal sciences, all from Ohio State.

Please Welcome Dr. Jess Pempek

I would like to welcome you all to session 221. Breeding Soundness Evaluations in the Bull with Dr. Erin Runcan. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Erin Runcan is an associate clinical professor in theriogenology and reproductive medicine at The Ohio State University College of Veterinary Medicine, where she has held a faculty position since 2014. She has a special interest in clinical theriogenology in all

species and has authored several peer-reviewed papers, book chapters, and continuing education lectures.

Please Welcome Dr. Erin Runcan

I would like to welcome you all to session 222. Reproductive Surgery in Bulls with Dr. Andrew Niehaus. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Andy Niehaus is a professor and service head of farm animal surgery at The Ohio State University. He grew up in West Virginia on his family's beef farm and earned a degree in chemical engineering from West Virginia University in 1999. After finishing

undergrad, Dr. Niehaus enrolled in the OSU College of Veterinary Medicine, officially becoming a Buckeye. After graduating in 2003, he remained at OSU to complete an internship and residency in farm animal surgery, and he has remained at OSU as faculty since. A staunch mentor to future veterinarians, Dr. Niehaus is also the faculty advisor to the OSU chapters of the Food Animal Club, the pre-vet club, and Christian Veterinary Fellowship. He is a member of the American Association of Bovine Practitioners. He and his wife, Laurie, have two children and live on a small farm northwest of Columbus.

Please Welcome Dr. Andrew Niehaus

I would like to welcome you all to session 223. Reproductive Surgery in Cows with Dr. Andrew Niehaus. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

I would like to welcome you all to session 224. Essential Oil Essentials, Part I with Dr. Carol Falck. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Falck began her professional career as a marine biologist. After a two-year research project in the Red Sea, her interests evolved into a desire to work with animals in a clinical setting. In 1997, she received her veterinary doctorate degree from the University of Pennsylvania School of Veterinary Medicine. Following a one-year

internship in medicine and surgery at Friendship Hospital For Animals in Washington, D.C., she relocated to south Florida. While working a conventional practice, Dr. Falck was presented with a cat in end-stage kidney failure, which led her to alternative methods of healing. She became a certified veterinary acupuncturist in 2001, a traditional Chinese veterinary herbalist in 2003, and received her aromatherapy certification from the Pacific Institute of Aromatherapy in 2017. Now residing in Georgia, Dr. Falck operates Petwise, a mobile veterinary practice emphasizing an integrative approach to animal wellness. In her free time, she enjoys spending time with her husband, hiking, cycling, practicing yoga, and playing guitar.

Please Welcome Dr. Carol Falck

I would like to welcome you all to session 225. Essential Oil Essentials, Part II with Dr. Carol Falck. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

I would like to welcome you all to session 227. Why the Atlas Should Not be Overlooked with Dr. Bill Ormston. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Ormston earned a veterinary degree from Iowa State University, a Doctor of Veterinary Homeopathy from the British Institute of London, and an animal chiropractic certification from the American Veterinary Chiropractic Association. A practitioner of a

unique style of medicine, he developed homeopathic first aid kits complete with flip chart instructions for animal owners, a “ChyroRyde” saddle interface to correct saddle fit issues, and 3-D skeletal models to help students with anatomy. He has co-written over 100 articles for various publications, including booklets on nutritional myths in horses and dogs with Dr. Amy Hayek. In 2012, they opened the premier Animal Chiropractic Education Source, which trains both veterinarians and chiropractors on how to adjust animals and become certified by the American Veterinary Chiropractic Association. His new book is titled, “Yes, It's Really A Thing.”

Please Welcome Dr. Bill Ormston

I would like to welcome you all to session 228. Current Research in Animal Chiropractic with Dr. Bill Ormston. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

I would like to welcome you all to session 236. Canine Lymphoma for the Busy Practitioner with Dr. Sue Ettinger. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Sue Ettinger is a veterinary cancer specialist, international speaker, book author, and YouTube video blogger. She received her veterinary training at Cornell University College of Veterinary Medicine, completed her residency in medical oncology at the

Animal Medical Center in New York City, and is one of approximately 450 board-certified specialists in medical oncology in North America. Also known as Dr Sue Cancer Vet®, she most passionate about raising awareness of cancer in animals and developed the slogan, “See Something, Do Something, Why Wait? Aspirate.®”, to promote early cancer detection and diagnosis. Dr. Sue practices at Veterinary Referral and Emergency Center in Norwalk, Conn.; is co-founder and chief medical officer of teleconsulting company Fidu; and was voted the 2019 Western Veterinary Conference Small Animal Continuing Educator of the Year.

Please Welcome Dr. Sue Ettinger

I would like to welcome you all to session 237. Feline Lymphoma for the Busy Practitioner with Dr. Sue Ettinger. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. I would like to welcome you all to session 248. Principles of Fluid Therapy (NEW) with Dr. Stephen DiBartola. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. DiBartola received his DVM degree from UC Davis in 1976. He completed an internship at Cornell University in Ithaca, New York, in 1977 and a residency in small animal medicine at The Ohio State University in 1979. After this, he was assistant professor at the

University of Illinois College of Veterinary Medicine until 1981, when he returned to Ohio State and taught for 35 years. He currently is an emeritus professor of medicine at the College of Veterinary Medicine. He received the Norden Distinguished Teaching Award in 1988 and the Zoetis Distinguished Teaching Award in 2014. His textbook "Fluid Therapy in Small Animal Practice" is in its fourth edition (2012). Dr. DiBartola has served as co-editor-in-chief for the "Journal of Veterinary Internal Medicine" since 1997. His clinical areas of interest include diseases of the kidney and fluid, acid base, and electrolyte disturbances.

Please Welcome Dr. Stephen DiBartola

I would like to welcome you all to session 249. Case-Based Acid-Base Interpretation (NEW) with Dr. Stephen DiBartola. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. His clinical areas of interest include diseases of the kidney and fluid, acid base, and electrolyte disturbances.

Please Welcome Dr. Stephen DiBartola

I would like to welcome you all to session 253. Challenging Cat Kidney Cases (NEW) with Dr. Stephen DiBartola. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. DiBartola received his DVM degree from UC Davis in 1976. He completed an internship at Cornell University in Ithaca, New York, in 1977 and a residency in small animal medicine at The Ohio State University in 1979. After this, he was assistant professor at the

University of Illinois College of Veterinary Medicine until 1981, when he returned to Ohio State and taught for 35 years. He currently is an emeritus professor of medicine at the College of Veterinary Medicine. He received the Norden Distinguished Teaching Award in 1988 and the Zoetis Distinguished Teaching Award in 2014. His textbook "Fluid Therapy in Small Animal Practice" is in its fourth edition (2012). Dr. DiBartola has served as co-editor-in-chief for the "Journal of Veterinary Internal Medicine" since 1997. His clinical areas of interest include diseases of the kidney and fluid, acid base, and electrolyte disturbances.

Please Welcome Dr. Stephen DiBartola

I would like to welcome you all to session 254. How to Not Run Out of Inventory Items with Ms. Nicole Clausen. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Nicole Clausen has more than 14 years of experience in the veterinary industry, 10 of which she spent in small animal practice. She worked her way up from receptionist to operations manager in various clinics and understands the intricacies and internal

workings of a successful practice. She is the founder and consultant at Veterinary Care Logistics, a consulting firm specializing in inventory management for veterinary professionals. Nicole has helped hundreds of veterinary practices from coast to coast create sustainable, lasting inventory management strategies. She is also the founder of the community and educational platform Veterinary Inventory Strategy Network; host of Inventory Nation Podcast; and founder of Inventory Ally, the first-ever inventory management software for veterinarians.

Please Welcome Ms. Nicole Clausen

I would like to welcome you all to session 255. How to Reduce Your Inventory Costs with Ms. Nicole Clausen. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

I would like to welcome you all to session 272. Ergonomics in the Veterinary Clinic with Dr. Sara White. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Sara White is a 1998 graduate of North Carolina State University College of Veterinary Medicine. She has worked in shelter medicine, including high-quality high-volume spay/neuter, throughout most of her career. Since 2006, Dr. White has operated Spay ASAP Inc., a nonprofit MASH-style mobile spay/neuter clinic

that has treated more than 58,000 animals in Vermont and New Hampshire. While working in spay-neuter, she developed an interest in ergonomics, health, wellbeing, and injury in veterinarians and staff, and in spring 2015, she completed a Master of Science in health ergonomics from the University of Derby in the U.K. In 2018, Dr. White was named Veterinarian of the Year by the Association of Shelter Veterinarians. She is a co-author of both the 2008 and 2016 ASV Spay Neuter Guidelines and the editor of the recently published textbook, “High-Quality, High-Volume Spay and Neuter and Other Shelter Surgeries.”

Please Welcome Dr. Sara White

I would like to welcome you all to session 273. Ergonomics for the High-Volume Surgeon with Dr. Sara White. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Erin Runcan is an associate clinical professor in theriogenology and reproductive medicine at The Ohio State University College of Veterinary Medicine, where she has held a faculty position since 2014. She has a special interest in clinical theriogenology in all

species and has authored several peer-reviewed papers, book chapters, and continuing education lectures.

Please Welcome Dr. Erin Runcan

I would like to welcome you all to session 279. Practitioner's Guide to Perineal Urethrostomy and Tube Cystostomy with Dr. Andrew Niehaus. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Andy Niehaus is a professor and service head of farm animal surgery at The Ohio State University. He grew up in West Virginia on his family's beef farm and earned a degree in chemical engineering from West Virginia University in 1999. After finishing

undergrad, Dr. Niehaus enrolled in the OSU College of Veterinary Medicine, officially becoming a Buckeye. After graduating in 2003, he remained at OSU to complete an internship and residency in farm animal surgery, and he has remained at OSU as faculty since. A staunch mentor to future veterinarians, Dr. Niehaus is also the faculty advisor to the OSU chapters of the Food Animal Club, the pre-vet club, and Christian Veterinary Fellowship. He is a member of the American Association of Bovine Practitioners. He and his wife, Laurie, have two children and live on a small farm northwest of Columbus.

Please Welcome Dr. Andrew Niehaus

I would like to welcome you all to session 280. Dental Disease in Small Ruminants and Camelids with Dr. Andrew Niehaus. At this time, we ask that you turn your cell phones to off or vibrate. I would like to welcome you all to session 281. Strategies for Estrous Synchronization in Sheep with Dr. Alvaro Garcia-Guerra. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Garcia Guerra grew up in Buenos Aires, Argentina, and developed his interest in cattle by helping in his nearby family farm. He obtained his veterinary degree (DVM) from Universidad de Buenos Aires (Argentina) in 2009. While a veterinary student, he

worked in a cattle embryo transfer and artificial insemination practice, which sparked his interest in cattle reproduction. In 2010, he moved to Canada to pursue a residency in ruminant field service at the Western College of Veterinary Medicine, University of Saskatchewan, where he also obtained his M.Sc. degree in 2013. Following his passion for reproductive physiology, he earned a Ph.D. in endocrinology and reproductive physiology from the University of Wisconsin-Madison in 2017. Dr. Garcia Guerra's research interests focus on investigating strategies that improve reproductive efficiency, primarily in beef cattle, and furthering our understanding on the causes and mechanisms involved in pregnancy loss in cattle. He is the recipient of the 2011 Pfizer Fellowship Award and is currently an assistant professor in The Ohio State University's Department of Animal Sciences.

Please Welcome Dr. Alvaro Garcia-Guerra

I would like to welcome you all to session 282. Triage for the Thin Camelid: How to Evaluate and Treat with Dr. Pamela Walker. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Walker is a 1992 graduate of Kansas State University College of Veterinary Medicine. After two years in private practice as a dairy practitioner, she completed a food animal medicine and surgery residency and earned her Master of Science degree at the

University of Illinois. She is a diplomate of the American College of Veterinary Internal Medicine, specializing in large animals. Dr. Walker taught senior veterinary students at University of Illinois, Washington State University, Michigan State University, and The Ohio State University. She was the full-time veterinarian for 10 years at a large Ohio alpaca farm and has recently finished two chapters for the next Dr. Fowler's Camelid Medicine and Surgery book. She is frequently invited to speak at owner and veterinary conferences, both in the U.S. and internationally, and was on the board of directors for the International Camelid Institute. Dr. Walker practices in Grove City, Ohio, at her clinic, Camelid Care Veterinary Services.

Please Welcome Dr. Pamela Walker

I would like to welcome you all to session 283. Neonatal Diseases and Disorders of Camelids: How to Keep Them Healthy with Dr. Pamela Walker. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. I would like to welcome you all to session 288. Compassion Fatigue: Prevention, Recognition, and Treatment with Ms. Megan Williams. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Megan Williams started her career in the veterinary profession over 25 years ago as a weekend kennel technician. During her early career, she held many positions, including veterinary assistant, shelter manager, and office manager. Eleven years ago during a

transformational period, she made the move to MedVet, which led her on a journey of returning to college, obtaining her degree in human resources, and supporting the veterinary profession in a new and exciting way. Along this journey, she obtained her certification in employee group benefits and became a certified compassion fatigue professional. Most recently, Megan received her certification through the QPR Institute as an online counseling and suicide intervention specialist. She uses her education and experiences to support others as they navigate the mental health challenges associated with working in the veterinary profession.

Please Welcome Ms. Megan Williams

I would like to welcome you all to session 289. Question, Persuade, Refer: Three Steps Anyone Can Use to Prevent Suicide with Ms. Megan Williams. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

I would like to welcome you all to session 290. Just Kidding Around: Dystocia and Neonatal Care in Farm Animals with Dr. Grace VanHoy. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Grace VanHoy is a clinical instructor in the farm animal medicine and surgery service at The Ohio State University Veterinary Medical Center, as well as an assistant professor with the veterinary preventative medicine department in the

parasitology section at the College of Veterinary Medicine. She received her bachelor's degree in animal sciences from Cal Poly, San Luis Obispo and her DVM degree from Ohio State, where she also completed an internship and residency in the farm animal medicine and surgery service. During her residency, Dr. VanHoy also completed a master's degree with an emphasis in veterinary parasitology, and she is a diplomate of the American College of Veterinary Internal Medicine.

Please Welcome Dr. Grace VanHoy

I would like to welcome you all to session 291. A Baker's Dozen: Common Parasite Eggs in Large Animals with Dr. Grace VanHoy. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Grace VanHoy is a clinical instructor in the farm animal medicine and surgery service at The Ohio State University Veterinary Medical Center, as well as an assistant professor with the veterinary preventative medicine department in the

parasitology section at the College of Veterinary Medicine. She received her bachelor's degree in animal sciences from Cal Poly, San Luis Obispo and her DVM degree from Ohio State, where she also completed an internship and residency in the farm animal medicine and surgery service. During her residency, Dr. VanHoy also completed a master's degree with an emphasis in veterinary parasitology, and she is a diplomate of the American College of Veterinary Internal Medicine.

Please Welcome Dr. Grace VanHoy

I would like to welcome you all to session 292. Pregnancy Toxemia: The Challenge of Diabetes in Late Pregnancy with Dr. Grace VanHoy. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Pam Kirby earned her associate degree in veterinary technology from Purdue University. For the past 20 years, she has worked in the ophthalmology department at Purdue University Veterinary

Hospital, where she is the lead veterinary ophthalmology technician. Pam was on the organizing committee for the Academy of Veterinary Ophthalmology Technicians (AVOT) and has since been the secretary. She teaches both veterinary technician students and veterinary students in the classroom, laboratory, and on the clinical floor. The author of several published articles, Pam has also spoken at the Purdue Veterinary Fall Conference, the Veterinary Ophthalmic Technician Society annual meeting (now AVOT), and the Purdue Veterinary Technician Symposium.

Katrina Lafferty is one of less than 200 technicians worldwide to hold a veterinary technician specialty in anesthesia. After earning her veterinary technology degree in 2005, she became a senior technician at the University of Wisconsin–Madison School of Veterinary Medicine in the Anesthesia and Pain Management Department. In 2016, Katrina moved to the Wisconsin National Primate Research Center, where she is a lead technician in the Surgery and Anesthesia Department. In her current position, she is

responsible for improving and innovating the anesthetic and analgesic care for the center's non-human primate species. With a passion for anesthesia and pain management, particularly in exotic species, Katrina has had the privilege of working with a veritable menagerie of animals, ranging from a two-day-old calf to a 60-year-old tortoise. She has written numerous articles and textbook chapter and presented at more than 40 continuing education seminars around the world.

Shana Lemmenes has worked as a technician in both small animal and academia since 2011 and obtained a specialty in equine veterinary nursing in 2015. She is a senior veterinary technician at the University of Minnesota Large Animal Veterinary Medical Center, where she works mainly with surgery and lameness. Her greatest interests outside of large animal surgery are emergency medicine and hippotherapy. Shana has also co-edited a textbook for Elsevier: *Mosby's Comprehensive Review for Veterinary Technicians*, 5th edition. She lives an hour south of the twin cities

with her 9-year-old daughter and boyfriend. They have two dogs, a viszla cross named Daisy and a field springer named Mazie.

Jordan Porter earned an associate's degree in veterinary technology from the Veterinary Technician Institute at Bradford School in Columbus, Ohio, in 2008. Shortly after graduating, she moved to South Carolina, passed the VTNE, and spent seven years in general practice. Jordan began working for an internal medicine and intensive care practice in 2015 and obtained her veterinary technician specialist certification in small animal internal medicine in 2019. She is a co-host of the Internal Medicine For Vet Techs podcast. Her interests include hematological disorders, specialty nursing care, and client communication.

Leslie Wereszczak has been a credentialed veterinary technician for more than 30 years. After graduating from the veterinary technology program at the State University of New York at Delhi in

1989, she joined the team t the University of Tennessee College of
Veterinary Medicine.

Please Welcome Ms. Pamela Kirby, Ms. Katrina Lafferty,
Ms. Shana Lemmenes, Ms. Jordan Porter
and Ms. Leslie Wereszczak.

I would like to welcome you all to session 297. Veterinary Technician Specialties Panel, Part II with Ms. Pamela Kirby, Ms. Katrina Lafferty, Ms. Shana Lemmenes, Ms. Jordan Porter and Ms. Leslie Wereszczak. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Dr. Jen Brandt is a licensed independent social worker, certified crisis worker, certified anti-oppression informed practitioner, and senior trainer for the Institute for Healthcare Communication. In 2000, Dr. Brandt co-founded The Ohio State University College of

Veterinary Medicine's Honoring the Bond services, one of the first U.S. programs aimed at recognizing and supporting the human-animal bond by providing education and resources to animal owners and animal care professionals. As the AVMA's Director of Wellbeing, Diversity, and Inclusion Initiatives, Dr. Brandt helped launch the association's Workplace Wellbeing Certificate Program, which supports veterinary professionals in developing the knowledge and skills needed to create healthy work systems; and the Brave Space Certificate Program, which explores the impact of stereotyping, unconscious bias, and workplace harassment. In 2020, Dr. Brandt was elected as a Distinguished Fellow of the National Academies of Practice in Social Work. She received her Ph.D. and Master of Social Work from The Ohio State University and holds a bachelor's in social work and sociology with a minor in Spanish from the University of Indianapolis.

Please Welcome Dr. Jen Brandt

I would like to welcome you all to session 303. Wellbeing and the Snake Oil Parable with Dr. Jen Brandt. At this time, we ask that you turn your cell phones to off or vibrate.
