

I would like to welcome you all to session 409. Type 2 Polysaccharide Storage Myopathy and Myofibrillar Myopathy in Warmbloods with Dr. Stephanie Valberg. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Stephanie Valberg is an internationally known expert on neuromuscular disease in horses. Her research has focused on the genetic and environmental basis for muscle disease in horses,

optimal methods for their diagnosis, and development of targeted treatment. She has received numerous awards for her work, including induction into the Equine Research Hall of Fame and giving the Milne Lecture at the American Association of Equine Practitioners Convention.

Please Welcome Dr. Stephanie Valberg.

I would like to welcome you all to session 410. Generalized Muscle Atrophy in Horses: Will it Come Back? with Dr. Stephanie Valberg. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

I would like to welcome you all to session 412. Equine Cutaneous Neoplasia with Dr. Megan McCracken. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Megan McCracken is a graduate of Cornell University College of Veterinary Medicine and a diplomate of the College of Veterinary Surgeons in large animal medicine. She completed internships at the University of Georgia and Chino Valley Equine Hospital, a

fellowship at Oregon State University, and an equine surgery residency at the University of Missouri. Following her residency, Dr. McCracken spent several years as an associate surgeon at Rainland Farm Equine Hospital, a sport horse-focused private practice near Seattle. In 2016, she moved to the University of Tennessee, where she ran the large animal emergency and critical care service. Since 2019, Dr. McCracken has been an equine surgeon at the University of Missouri, where her focus is equine orthopedic and soft tissue surgery, as well as equine sports medicine. Her research interests include equine pain management and septic arthritis.

Please Welcome Dr. Megan McCracken.

I would like to welcome you all to session 413. Management Strategies for Challenging Equine Wounds with Dr. Megan McCracken. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

I would like to welcome you all to session 415. Immune Development in Calves with Dr. Angel Abuelo. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Abuelo obtained his veterinary and Ph.D. degrees from the University of Santiago de Compostela in Spain and a master's in veterinary education from the Royal Veterinary College in the U.K. He is an assistant professor of cattle health and a dairy extension

veterinarian at the Michigan State University College of Veterinary Medicine. At MSU, Dr. Abuelo maintains federally funded research and extension programs, contributes to the clinical training of final-year veterinary students, and provides continuing education to veterinarians. His research focuses on the interplay between nutrition, metabolism, and immune function in dairy cows and calves. Dr. Abuelo is board certified in dairy practice by the American Board of Veterinary Practitioners, a diplomate of the European College of Bovine Health Management, and an associate diplomate of the American College of Veterinary Internal Medicine.

Please Welcome Dr. Angel Abuelo.

I would like to welcome you all to session 416. Calf Vaccination: Science and Strategies with Dr. Angel Abuelo. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. I would like to welcome you all to session 419. Potbellied Pig Primary Care, Part I with Dr. Laurie Millward. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Laurie Millward is a 2006 graduate of The Ohio State University College of Veterinary Medicine (OSU CVM). She completed a combined clinical pathology residency and M.S. graduate program in the Department of Veterinary Biosciences at OSU in 2010. Dr.

Millward is currently employed by the American Society for the Prevention of Cruelty to Animals (ASPCA) as senior director of veterinary services at the Cruelty Recovery Center. In this role, she coordinates and participates in the provision of animal rescue and veterinary care to animal victims of natural disasters and large-scale cruelty cases in the United States. Her previous jobs include work in private practice as a small animal and exotic animal general practitioner; nearly nine years as a professor in the Community Practice, Outreach, and Shelter Medicine Department at OSU CVM; and as chief veterinarian at Columbus Humane. Her areas of special interest are clinical pathology and shelter medicine.

Please Welcome Dr. Laurie Millward.

I would like to welcome you all to session 457. Essential Strategies to Maximize Communication Effectiveness with Dr. Courtney Campbell. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Dr. Courtney Campbell is a veterinary surgeon, media personality, and chief creative officer of Vet Candy. He graduated in 2005 from Tuskegee University School of Veterinary Medicine, after which he

completed three internships and a residency training program. He became board certified in small animal surgery by the American College of Veterinary Surgery in 2019. Dr. Campbell has been recognized with the Lily Merit Award in veterinary school, the Best Clinical Presentation at the Veterinary Orthopedic Society Meeting, and most recently an Excellence in Journalism award at the Global Pet Expo. In addition to serving as an adjunct professor at the University of Hartford and being a featured lecturer for Merck Animal Health, Dr. Campbell is also a frequent guest expert on programs such as The Doctors, Home and Family, The Real, Live with Kelly, and Rachel Ray. He is a co-host of Pet Talk, a national talk show on Nat Geo Wild; host of a pet parent education series on YouTube; and host of The Dr. Courtney Show podcast on Pet Life Radio.

Please Welcome Dr. Courtney Campbell.

I would like to welcome you all to session 458. Surgery and Communication During a Pandemic: A Delicate Balance with Dr. Courtney Campbell. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. I would like to welcome you all to session 475. Laparoscopic Artificial Insemination, Part I: Is it Something I Can Do? with Dr. Rachael Gately. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

A Connecticut native, Dr. Rachael Gately works at Tufts Veterinary Field Service, where she is a clinical assistant professor and member of a 10-doctor team providing large animal clinical service

while educating fourth-year veterinary students. Her daily activities at TVFS include dairy cattle herd work, small ruminant general practice, and all avenues of theriogenology. Dr. Gately earned her DVM from Texas A&M University in 2012, after which she completed an internship at Cummings School of Veterinary Medicine at Tufts University. For more than 25 years, she has raised nationally competitive breeding sheep, which is the root of her passion for small ruminant advanced reproductive techniques. Dr. Gately currently splits her small ruminant ART work between seed stock producers and researchers producing transgenic models to study human genetic neurologic diseases.

Please Welcome Dr. Rachael Gately.

I would like to welcome you all to session 476. Laparoscopic Artificial Insemination, Part II: Secrets of Success with Dr. Rachael Gately. At this time, we ask that you turn your cell phones to off or vibrate. Dr. Gately earned her DVM from Texas A&M University in 2012, after which she completed an internship at Cummings School of Veterinary Medicine at Tufts University. For more than 25 years, she has raised nationally competitive breeding sheep, which is the root of her passion for small ruminant advanced reproductive techniques. Dr. Gately currently splits her small ruminant ART work between seed stock producers and researchers producing transgenic models to study human genetic neurologic diseases.

Please Welcome Dr. Rachael Gately.

I would like to welcome you all to session 478. Cosmetic Dehorns for the Ambulatory Practitioner with Dr. Rachael Gately. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

A Connecticut native, Dr. Rachael Gately works at Tufts Veterinary Field Service, where she is a clinical assistant professor and member of a 10-doctor team providing large animal clinical service while educating fourth-year veterinary students. Her daily activities

at TVFS include dairy cattle herd work, small ruminant general practice, and all avenues of theriogenology. Dr. Gately earned her DVM from Texas A&M University in 2012, after which she completed an internship at Cummings School of Veterinary Medicine at Tufts University. For more than 25 years, she has raised nationally competitive breeding sheep, which is the root of her passion for small ruminant advanced reproductive techniques. I would like to welcome you all to session 481. It's Not Always Training: Mastering the Training Needs Analysis with Ms. Heather Romano. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. You can access the evaluation from the MVC mobile app by clicking on the appropriate session under the schedule icon.

Heather has been in the veterinary field for 25 years, having held nearly every position found at a veterinary practice, including regional multi-unit director and private hospital management

consultant. She holds a master's degree in human resources, is dual certified in human resources through the HR Certification Institute and Society for Human Resource Management, and is currently working towards her juris doctorate. Throughout her career, Heather has found that a practice's culture, leadership, and training are cornerstones to retaining team members and creating a client experience that cultivates loyalty. Her goal is to help the veterinary field elevate its employee relations to draw the best long-term talent possible.

Please Welcome Ms. Heather Romano.

I would like to welcome you all to session 482. How to Train Your Centennial with Ms. Heather Romano. At this time, we ask that you turn your cell phones to off or vibrate. As a reminder, this session is being recorded and per the local ordinance, you must wear a mask covering your mouth and nose while indoors, unless eating or drinking. Please take a moment at the end of the session to complete a speaker and session evaluation. Leslie has been a credentialed veterinary technician for more than 30 years. After graduating from the veterinary technology program at the State University of New York at Delhi in 1989, she joined the team at the University of Tennessee College of Veterinary Medicine.

Leslie enjoys the unpredictable nature of emergency and critical care work and the diverse caseload it provides, as well as teaching veterinary and technician students in the clinical and laboratory settings. A passionate advocate for the veterinary technician profession, Leslie is involved with her state technician association and NAVTA, sits on the advisory board of the Veterinary Nurse Initiative, and serves as a board member at large for the Academy of Veterinary Emergency & Critical Care Technicians and Nurses. She also serves as the vice chair of the Tennessee State Board of Veterinary Medical Examiners. Leslie is a RECOVER CPR-certified instructor and also holds a bachelor's degree in business management and a master's in management and leadership.

Please Welcome Ms. Leslie Wereszczak.
